

Exhibit U

NAY-but-BUY Across Sectors

Count supported. Count 2 (front-running of NDAA enactments) extension, with corroboration on Count 3 (financial-interest conflicts) and Count 1 (composite axis) at the chamber-wide scale.

Question. Respondent’s household trading cluster around NDAA enactment dates is documented in Exhibit E. Does that pattern extend across other sectors where the Member publicly votes against the bill while the household trades the bill’s beneficiaries during the same window?

Short answer. It extends. Across 62 distinct respondent NAY passage-votes on sectoral bills during 2017–2026, the household traded in beneficiary-sector tickers in 67 bill × sector pairings, with a **2.39× aggregate BUY-versus-SELL ratio across 458 trades** (323 buys to 135 sells). The ratio is highest in defense and energy; the Healthcare Seniors Access bill is associated with a single-day 57-trade cross-sector cluster.

1. Method

For each respondent NAY passage-vote during 2017–2026 on a sectoral bill (defense, energy, healthcare, intelligence, appropriations, supplementals — 62 unique NAY votes identified), classify the bill’s beneficiary sector, then count household PTR trades in beneficiary-sector tickers within ±30 days of the vote date. Aggregate by sector. The ticker sector map (defense prime; defense tech; big tech; pharma; healthcare devices; healthcare services; energy; crypto; intel / cyber) follows the case-schema ticker normalization. NAY votes are sourced from the canonical roll-call ledger filtered to bioguide K000389 voting Nay/No on passage-class questions. Trades are sourced from the household PTR canonical view (amendment-cascade deduplicated) and limited to BUY/SELL transaction types in beneficiary-sector tickers within the ±30-day window.

The hypothesis under test is whether the NDAA-window NAY-but-BUY pattern documented in Exhibit E is confined to defense or recurs in other sectors whose beneficiaries the household holds or accumulates.

2. Sector aggregates

Across 62 sectoral NAY votes, the household traded beneficiary-sector tickers in 67 bill × sector pairings:

Sector	NAY votes cov- ered	±30d trades	Upper-bound \$	BUYs	SELLs	BUY:SELL ratio
Defense prime	37	187	\$3,190,000	145	42	3.45×
Energy	21	183	\$3,240,000	127	56	2.27×
Pharma	1	28	\$490,000	8	20	0.40×
Intel / cyber	3	25	\$635,000	19	6	3.17×
Healthcare devices	1	16	\$240,000	11	5	2.20×
Healthcare services	1	13	\$195,000	8	5	1.60×
Defense tech	3	6	\$90,000	5	1	5.00×

Reader-evaluable observations on the per-sector rows:

- **Defense prime — 145 buys and 42 sells across 37 NAY votes.** Extends the NDAA-enactment-window pattern documented in Exhibit E into DoD appropriations, DHS appropriations, intelligence authoriza-

tions, supplementals, and the Israel security supplemental — votes the NDAA-only framing in Exhibit E does not capture.

- **Energy — 127 buys and 56 sells across 21 NAY votes.** A second-sector extension into energy primes (XOM, CVX, COP, DVN, OXY, SLB, and analogs). The 2017–2018 stretch carries the highest trade density and falls in the same period during which respondent was publicly establishing his anti-fossil-fuel posture.
- **Intel / cyber — 19 buys and 6 sells across 3 NAY votes.** Respondent NAYs on intelligence authorizations and DHS appropriations during windows in which the household held cyber- and intel-adjacent primes.
- **Healthcare cluster on 2017-11-02, H.R. 849 Protecting Seniors Access to Medicare Act — 57 trades on a single NAY vote across pharma + healthcare devices + healthcare services.** The pharma component carries 8 buys and 20 sells; the healthcare-devices component carries 11 buys and 5 sells; the healthcare-services component carries 8 buys and 5 sells. One vote falls in a window containing differentiated trading across three healthcare sub-sectors on the same calendar week.

3. Highest-volume single-event pairings

The 30 highest-volume bill × sector pairings:

Vote date	Bill	Sector	±30d trades	BUYs	SELLs	Sample tickers	Bill title
2017-07-19	H.R. 2883	Energy	32	26	6	COP, CVX, DVN, OXY, XOM	Promoting Cross-Border Energy Infrastructure Act
2017-11-02	H.R. 849	Pharma	28	8	20	ABBV, AMGN, BIIB, BMY, GILD, JNJ, MRK, PFE, REGN	Protecting Seniors Access to Medicare Act
2018-03-08	H.R. 1119	Energy	27	27	0	COP, CVX, DVN, OXY, SLB, XOM	SENSE Act — buys only, zero sells
2017-09-14	H.R. 3354	Energy	26	11	15	COP, DVN, OXY, SLB, XOM	DOI / environment appropriations FY2018
2018-07-19	H.R. 6147	Energy	18	18	0	COP, CVX, DVN, OXY, SLB, XOM	DOI / environment appropriations FY2019 — buys only
2017-11-02	H.R. 849	Healthcare devices	16	11	5	ISRG, SYK	Protecting Seniors Access to Medicare Act
2020-09-24	H.R. 4447	Energy	14	9	5	CVX, DVN, OXY, XOM	Expanding Access to Sustainable Energy Act
2024-07-24	H.R. 8998	Defense prime	13	8	5	HON	DOI / environment FY2025
2017-11-02	H.R. 849	Healthcare services	13	8	5	CI, CVS, HUM	Protecting Seniors Access to Medicare Act
2017-12-07	H.J. Res. 123	Defense prime	11	9	2	HON	Continuing appropriations FY2018
2017-12-21	H.R. 4667	Defense prime	11	9	2	HON	Supplemental disaster appropriations FY2018

Vote date	Bill	Sector	±30d trades	BUYs	SELLs	Sample tickers	Bill title
2026-03-05	H.R. 7744	Intel / cyber	11	7	4	(sector-mapped by issuer)	DHS appropriations FY2026
2018-05-24	H.R. 5515	Defense prime	10	7	3	HON, LMT	NDAA FY2019
2018-07-12	H.R. 6237	Defense prime	10	8	2	LMT	Matthew Young Pollard Intelligence Authorization FY2018–19
2024-06-28	H.R. 8752	Intel / cyber	10	10	0	(sector-mapped)	DHS Appropriations FY2025
2018-07-12	H.R. 3281	Defense prime	10	8	2	LMT	Reclamation Title Transfer Act
2025-03-11	H.R. 1968	Defense prime	8	5	3	(sector-mapped)	Full-Year Continuing Appropriations FY2025
2026-03-05	H.R. 7744	Defense prime	8	3	5	HON, PLTR	DHS Appropriations FY2026
2017-02-02	H.J. Res. 37	Defense prime	7	6	1	HON	Disapproving DoD / GSA rule
2020-07-31	H.R. 7617	Defense prime	7	7	0	(sector-mapped)	DoD Appropriations FY2021

Two single-event rows show buys with no sells (BUYs > 0 and SELLs = 0):

- 2018-03-08 SENSE Act NAY followed by 27 energy-prime buys and zero sells in the ±30-day window.
- 2018-07-19 Interior appropriations FY2019 NAY followed by 18 energy-prime buys and zero sells.

The 2017-07-19 NAY on the Cross-Border Energy Infrastructure Act falls in a window containing 32 trades with a 26-to-6 buy distribution.

4. Defense-prime extension

Exhibit E documents 14 NDAA-enactment-window defense-prime trades across four NDAA enactments. This exhibit broadens that to **187 trades across 37 NAY votes on defense-related bills** (NDAA + DoD appropriations + DHS appropriations + intelligence authorizations + supplementals + the Israel security supplemental). The aggregate distribution is 145 buys to 42 sells — a 3.45× ratio, which is in the same direction as the pre-passage-accumulation pattern Exhibit E documents on the NDAA-specific subset.

The defense-prime cells with BUYs exceeding SELLs at $n \geq 5$:

Date	Bill	n	BUYs	SELLs	Bill title
2017-12-21	H.R. 4667	11	9	2	Supplemental appropriations FY2018
2017-12-07	H.J. Res. 123	11	9	2	Continuing appropriations FY2018
2018-07-12	H.R. 3281	10	8	2	Reclamation Title Transfer

Date	Bill	n	BUYs	SELLs	Bill title
2018-07-12	H.R. 6237	10	8	2	Pollard Intelligence Authorization FY2018–19
2024-07-24	H.R. 8998	13	8	5	DOI / environment FY2025
2020-07-31	H.R. 7617	7	7	0	DoD Appropriations FY2021
2018-05-24	H.R. 5515	10	7	3	NDAA FY2019
2018-07-19	H.R. 6147	6	6	0	DOI / environment FY2019
2017-07-27	H.R. 3219	6	6	0	DoD Appropriations FY2018
2017-07-28	H.R. 3180	6	6	0	Intelligence Authorization FY2018
2017-02-02	H.J. Res. 37	7	6	1	Disapproving DoD / GSA rule
2020-07-21	H.R. 6395	6	5	1	NDAA FY2021
2017-07-14	H.R. 2810	5	5	0	NDAA FY2018 (initial passage)

The NDAA-only 14-trade Exhibit E subset broadens into a 187-trade defense-NAY-vote-window population with a 3.45× buy-to-sell ratio across the full respondent voting record.

5. The 2017-11-02 H.R. 849 healthcare cluster

A single NAY vote on the Protecting Seniors Access to Medicare Act falls in a window containing trade activity in three healthcare sub-sectors within ±30 days:

- Pharma — 28 trades (8 buys, 20 sells) across ABBV, AMGN, BIIB, BMY, GILD, JNJ, MRK, PFE, REGN. The sell-direction distribution is in the direction of a household reducing pharma exposure ahead of anticipated regulation-driven sector compression.
- Healthcare devices — 16 trades (11 buys, 5 sells) in ISRG and SYK. The buy-direction distribution on devices runs opposite the pharma sell-direction distribution.
- Healthcare services — 13 trades (8 buys, 5 sells) in CI, CVS, HUM, the Medicare-Advantage-relevant insurers. Mixed direction.

The 57-trade single-bill-vote cluster falls in a window containing differentiated trading across three healthcare sub-sectors on the same calendar week.

6. Energy NAY-but-BUY rows

Energy NAYs and the household ± 30 -day trade distribution:

Vote date	Bill	n	BUYs	SELLs	Bill summary
2017-07-19	H.R. 2883	32	26	6	Cross-Border Energy Infrastructure Act
2017-09-14	H.R. 3354	26	11	15	DOI / environment appropriations FY2018
2018-03-08	H.R. 1119	27	27	0	SENSE Act
2018-06-08	H.R. 5895	3	0	3	Energy & water appropriations FY2019
2018-07-19	H.R. 6147	18	18	0	DOI / environment appropriations FY2019
2020-09-24	H.R. 4447	14	9	5	Expanding Access to Sustainable Energy Act
2023-03-30	H.R. 1	4	2	2	Lower Energy Costs Act
2023-10-26	H.R. 4394	5	3	2	Energy & water FY2024
2024-07-24	H.R. 8998	5	3	2	DOI / environment FY2025
2025-02-07	H.R. 26	5	3	2	Protecting American Energy Production Act
2025-03-05	H.J. Res. 42	6	3	3	DOE rule disapproval
2025-03-06	S.J. Res. 11	6	3	3	DOE rule disapproval
2025-03-27	H.J. Res. 24	7	3	4	DOE rule disapproval

Vote date	Bill	n	BUYs	SELLs	Bill summary
2025-03-27	H.J. Res. 75	7	3	4	DOE / efficiency rule disapproval
2025-09-04	H.R. 4553	4	3	1	Energy & water FY2026
2025-09-18	H.R. 3062	5	3	2	Cross-Border Energy Infrastructure

The table enumerates the 16 highest-volume energy NAY-vote rows, totaling 174 trades / 120 BUYs / 54 SELLs; the §2 sector aggregate of 183 / 127 / 56 across 21 NAY votes includes 5 additional low-volume votes (cumulatively 9 trades / 7 BUYs / 2 SELLs) not enumerated at row grain in this section. The 2017–2018 buy-direction cluster (32 + 27 + 18 = 77 trades, with most labeled BUY) falls in the period during which respondent was publicly establishing his anti-fossil-fuel posture. The 2025-onward rows show a smaller per-vote trade count, which is reader-evaluable as a household winding-down in energy or as a reflection of a Trump-era regulatory environment with a different trade signal.

7. Headline metric

Across 62 sectoral NAY passage-votes during 2017–2026, the household executed **458 trades within ±30 days, with 323 buys and 135 sells — a 2.39× aggregate BUY-versus-SELL ratio**. The pre-passage-accumulation pattern documented on the NDAA-specific subset in Exhibit E recurs across the sector groupings respondent’s committees touch.

End of exhibit.
